Denys Koval

Full-stack developer · Oslo, Norway

+47 939 65 681 · kovaldenys993@gmail.com ·github.com/KovalDenys1 · denyskoval.com

Full-stack developer in Oslo, born in Ukraine. IT developer apprentice at Comono AS, and a genuinely positive person to work with. I build web products end to end and ship them – my own multiplayer game site, Boardly, is live with players every week.

EXPERIENCE

IT developer apprentice (IT-utvikler lærling) – Comono AS, Oslo August 2026 – present

- Ground-control software for a drone client – the app an operator plans, flies and watches a drone from.
- Backend work on a client platform – Python services, PostgreSQL schemas and migrations, and AWS (CloudWatch Logs, S3, Cognito) for debugging production issues.

Earlier work

- 2024 – Activity host (volunteer), Red Cross, Oslo – planned and ran activities for young people.
- 2024 – Health assistant, nursing home, Oslo – supported care staff with daily care, meals and activities.
- 2021–2022 – Social media, Wellmats, Ukraine – Instagram content for a premium car-interior brand.

PROJECTS

Boardly – boardly.online

Multiplayer board games in the browser: create a room, share the link, and friends join as guests – no download. 11 games in six languages (English, Norwegian, German, Spanish, Ukrainian, Russian), with a Premium subscription through Stripe. Around 70 finished multiplayer games a week (October 2026).

Next.js, TypeScript, Tailwind CSS, Supabase Realtime, PostgreSQL with Prisma, NextAuth, Vercel, Sentry

Second Brain

My own AI agent system: Claude Code skills, hooks and scheduled routines run an Obsidian vault – morning briefings, end-of-day logs, budget imports, weekly retros – from a Raspberry Pi, with a Telegram bot and a dashboard on top. Bot source: github.com/KovalDenys1/life-bot-public.

Python, Claude Code, Raspberry Pi, Telegram Bot API

SEO Analyzer

SEO audits through one API call – FastAPI backend, Next.js product layer with accounts, API keys and usage quotas. Live demo: seo-analyzer-web-ebon.vercel.app.

SKILLS

Languages and frameworks	TypeScript, JavaScript, React, Next.js, Node.js, Tailwind CSS, Python
Data	PostgreSQL, Prisma, Supabase
Cloud and tools	Vercel, AWS basics (S3, Cognito, KMS, CloudTrail, CloudWatch Logs), Git and GitHub, Linux, Sentry, Stripe, Figma, Docker (learning)
AI tooling	Claude Code – skills, hooks, agents and scheduled routines
